

Emory Salamanca Program  
Semester Study Abroad in Spain  
Fall, Spring and Academic Year Programs

## **Bienvenidos**

The Department of Spanish and Portuguese at Emory University would like to encourage you to participate in our program in Spain during the Fall, Spring or Academic Year. The goals of our program are clear:

1. We want to improve your Spanish language skills. Beginning students will return capable of carrying on a basic conversation in Spanish while intermediate students will gain various levels of advanced proficiency. Advanced students will have the opportunity to continue, in situ, their exploration of Spanish culture. From the living arrangements to the formal course work, you will have the chance to speak Spanish six or more hours each day.

2. Spain is a diverse country rich in history and cultures. Through extensive travel, excursions, field trips, and regular discussion sessions we attempt to introduce you to the entire Iberian Peninsula. In addition to Spanish, you will learn about other languages spoken in the Iberian Peninsula like Catalan or Galician. You will learn to appreciate the gastronomical differences between regions and you will explore diverse geographies from high mountains to spectacular coastlines.

3. We want you to have the most meaningful experience of your undergraduate education. As you explore new cultures, we want you to have time to reflect on your own cultural heritage as well as meet new friends, experience different ways of living, taste new foods, and speak new languages. ¡Bienvenidos!

Sincerely,  
Carmen Torres  
On-Site Director
