

Internship Placement Process

The program guarantees an internship placement. However, it is important to be flexible during the placement process, as there are many factors that impact what internships are available.

1 Complete Application Process

Mid November - Early February

Select preferred industry sector as part of the application process. Sample industry sectors are online at studyabroad.emory.edu/globalintern.

2 Interview with Internship Placement Provider

Late February - Late March

During this interview, the internship placement provider will learn about your desired industry and skill set. The provider will then work to create a match for you. Emory works closely with two providers (AIC and EUSA), depending on the global city.

3 Interview with Employer

Late March - Late May

During this interview, the supervisor at the company will discuss expectations at the internship as well as evaluate your potential fit for the position.

4 Confirm your offer

Early April - Late May

If the employer extends an offer, you will confirm your internship placement. In some cases, a second interview with a different company will be arranged.
