Information Technology and Computer Science — front-end and back-end coding, IT and technical customer support such as:
• API Development
• System Development

Sample internship roles and responsibilities:
• Propose article plans, conduct interviews, and write articles for company-owned media
• Provide support for Japanese team members when English is required, such as translating and/or proofreading English-language documents
• Conduct research and report on the work style in the US and/or in your home country
• Create articles and blog posts using social media, conduct market research on competitive products

Nonprofit and NGO — program development and management, think tanks and advocacy groups such as:
• Public Policy and International Affairs
• Human Rights and Social Justice

Please note: Internships in an English language work environment are available in addition to those in Japanese. Japanese language skills will offer a larger variety of placement options.

Exact internship is determined through personalized placement process for each student.
